

# Product Identification

Horne Label & Packaging has become a leader in shellfish identification tags.

We offer a trendsetting poly-synthetic material available in 4, 6, 7 & 10 mil. thickness both thermal transfer printable and direct thermal printable.

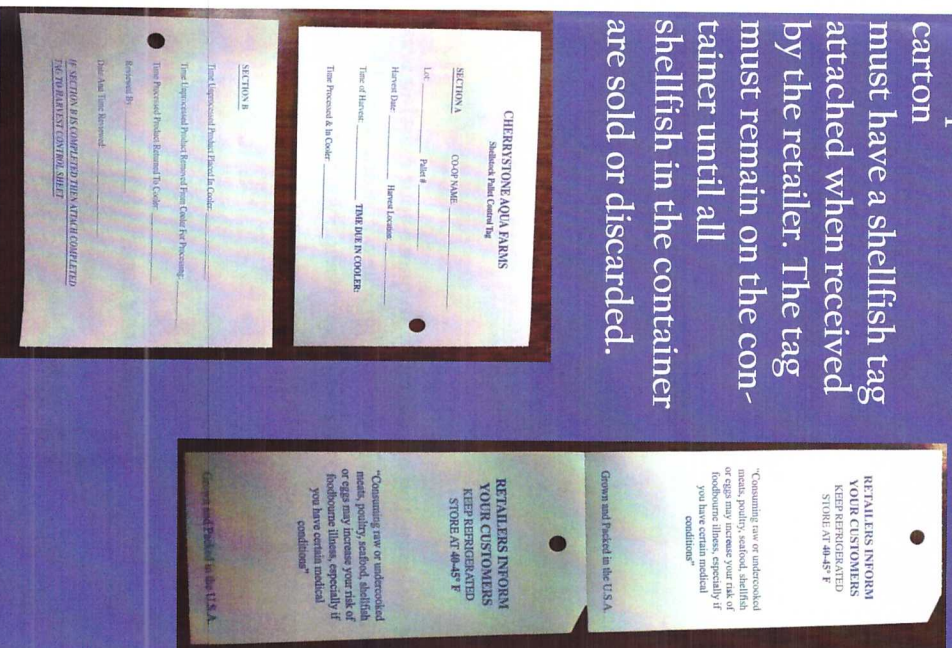

Some of the more notable attributes of choosing this material is it's high resistance to heat & extreme cold, ensuring that your valuable information stays in tact until it reaches the consumer.

We are also on the forefront of providing COCCI tags for use in the innovative automatic shellfish packaging system, **Cocci Luciano Srl**. The company has become a leading European constructor of state-of-the-art equipment for on-shore live shellfish processing and packing and we have the tags to help this machinery streamline your whole operation.

# Retailer's Information Tags

Any container of live shellfish, other than those packed in a master carton must have a shellfish tag attached when received by the retailer. The tag must remain on the container until all shellfish in the container are sold or discarded.

The tag must then be kept on file by the retailer for 90 days. The filed tags must be readily available for inspection by authorized public health inspectors. Tags are important for tracing the source of shellfish in the event of an illness.

# APPLICATIONS

- DEPURATION TAGS
- HARVESTER TAGS
- LOBSTER CRATE TAGS
- POST HARVEST TREATMENT TAGS
- SHELLFISH STYLE & QUANTITY IDENTIFICATION TAGS
- SHUCKING TAGS
- WET STORAGE TAGS
- POLY-SYNTHETIC TAGS
- TYVEK LOBSTER CRATE TAGS
- GANGS OF TYVEK TAGS
- LASER IMPRINTABLE TAGS
- PINFEED TAGS
- PRESSURE SENSITIVE LABELS
- SINGLE TAGS
- THERMAL TRANSFER TAGS
