

Shellfish Packaging

Knitted Mesh Shellfish Bags

Send Oysters, Mussels, or Clams to market in knitted mesh produce bags. Choose from a variety of colors (BLUE, BLACK, GREEN, PURPLE, YELLOW, and RED) in hexagonal or diamond patterns to accent your cultured shellfish package.

Knitted nets are available in a variety of lay flat widths (11", 13", 15", 16.25", and 19").

You can purchase tubular knitted nets in roll form ranging from 250' to 500' or cut and clipped to your designated length.

The raw material for these knitted bags is made from food grade polyethylene resin. Not suitable for temperatures above 180 °F.

Waxed Corrugated Packaging

For delicate ice-packed seafood, you depend on high-performance packaging to keep products fresh from the catch to the customer. You need water-resistant boxes that you can trust.

We welcome the opportunity to quote your existing wax packaging or to help you design a new custom waxed box for your specific needs. We can provide you with custom samples for your approval, before making a production run.

Tag Fasteners

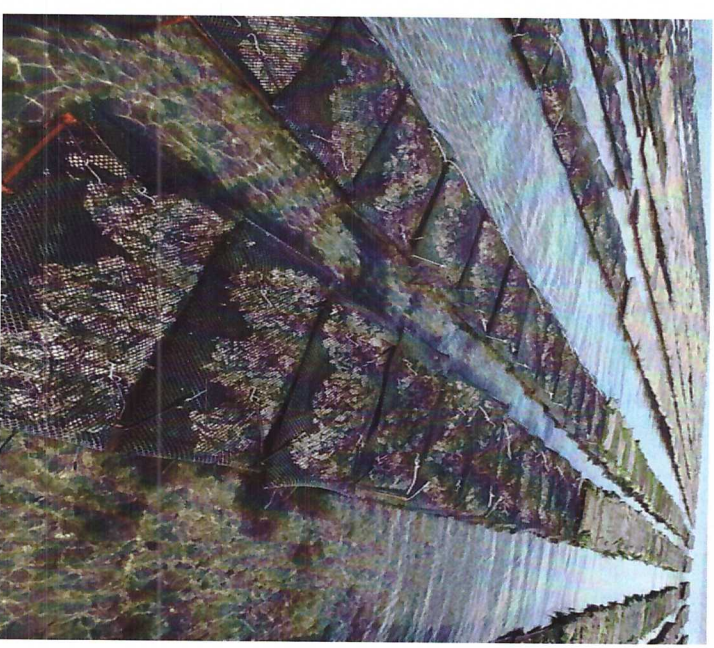

Diamond Deadlocks

The most common method of attaching shellfish tags to bags or bins of products is with a stainless steel diamond deadlock fastener. **Ask us about our fasteners today!!**
